Water Purifier Classic

Water is ejected in form of a cone. A clockwise vortex flow is realized by a gold-plated disc. Clumped molecule structures are broken up and harmful information is deleted. At the same time the water takes up oxygen, realizing a deep purification. By flowing through a cartridge with special granules the vortexed water is further exponentiated. Just fix to your water tap and go.

Atelier Imagination
Sophisticated Connections

Water Purifier Petite with ball joint.
Function like Water Purifier Classic.
Just fix to tap and go.

Shower Water Purifier
Function like Water Purifier Classic and Petite.
The vortex mechanism keeps lime dissolved.
